More volunteers are needed to work the radios in the club radio room each weekend in September from 9am till 9pm.

Please contact KB9LBC Jason Cato at kb9lbc@gmail.com to volunteer.

Thank you!

FAA Reauthorization Act Language Serves to Exclude Vast Majority of Amateur Radio Towers

07/12/2019

Language in the Federal Aviation Administration (FAA) Reauthorization Act of 2018 will exclude all but a small number of Amateur Radio towers from marking requirements. Thanks to action taken in 2017 and 2018 by ARRL, the bill's original language was amended to the extent that amateur towers, as well as residential towers used for over-the-air TV reception, were effectively exempted from marking requirements.

The topic was addressed at the annual "Ham Radio and the Law" forum at the Dayton Hamvention® this past May. Some key points from that presentation: (1) Towers covered by the rules are structures at least 50 feet tall that support an antenna and are located in a rural area or on farmland or immediately adjacent to such land. (2) According to the Act, the term "covered tower" does *not* include any structure that is adjacent to a house, barn, or other building, and "is within the curtilage of a farmstead

or adjacent to another building or visible structure.”

ARRL Regulatory Information Manager Dan Henderson, N1ND, explains that, while a few Amateur Radio towers will fall under the Act’s marking requirements and will have to be registered, towers in residential yards or within farmland are specifically exempted.

Restraint Urged in Response to 2-Meter Reallocation Proposal

07/06/2019

Representatives of International Amateur Radio Union (IARU) member-societies in Europe are advising restraint in the wake of a proposal to consider the allocation of 146 – 148 MHz to the Aeronautical Mobile Service (AMS) at World Radiocommunication Conference 2023 (WRC-23). France recently raised the prospect during a European Conference of Postal and Telecommunications Administrations (CEPT) meeting in Prague, held in advance of WRC-19. A WRC-19 agenda item would call for studying a range of frequencies for AMS applications, including 144 – 146 MHz, and a decision could be made at WRC-23.

The French draft resolution seeks studies of possible new AMS primary allocations in several bands in the range from 144 MHz to 22.2 GHz on a primary basis, “while ensuring the protection of existing services in those bands and, as appropriate, adjacent bands, and not constraining future development of these services.”

The Radio Society of Great Britain (RSGB) released a [statement](#) last week, in part pointing that as proposed, the French resolution “is not an eviction or re-allocation of amateurs, but nonetheless is unwelcome and presents significant challenges. Unlike some other bands where amateurs do share, aeronautical applications are amongst the most difficult due to the altitudes and long free-space distances involved.”

Any consideration to allocate additional services in a band that’s already allocated on a primary basis to an incumbent service — Amateur Radio, in this case — must begin with a sharing/compatibility study. The IARU has expressed “grave concern” to any proposal that would include 144 – 146 MHz in a WRC agenda item and has pledged to make every effort to

fully protect Amateur Radio interests and seek the support of regulators. At the Prague meeting, only Germany opposed the proposal, which has been carried forward to the higher-level CEPT Conference Preparatory Group (CPG) meeting in August. Support from at least 10 CEPT administrations and fewer than six in opposition would move the issue forward as a CEPT resolution, making it highly likely that it would appear on the agendas of WRC-19 and WRC-23.

In a post to the Moon-Net news group, Deutscher (German) Amateur Radio Club (DARC) Frequency Manager Bernd Mischlewski, DF2ZC, stressed the importance that Amateur Radio speak with a single voice and asked the Amateur Radio community to refrain from contacting individual administrations or the EU.

“This would weaken our position and take away power and vigor from the systematic approach by IARU and country Amateur Radio societies,” Mischlewski said. “This particularly applies [to] online petitions.” One frantic petition that’s collecting both signatures and donations calls on hams to “Stop the 2 Meter Band (144 – 146 MHz) being taken away from Radio Amateurs,” which is not what the draft French resolution would do. Mischlewski speculated that the primary reason for the scant opposition at Prague was the revised French proposal’s last-minute arrival.

“Consequently, most other European countries had no time for internal discussions, let alone formulating their position,” Mischlewski said.

With the support of regulatory experts among its member-societies, IARU “is intensively working on executing their influence within the current process and trying to keep the 2-meter band as it is now,” Mischlewski said. He pointed out that funding for these activities comes from IARU member-societies. “So, those who left their country’s Amateur Radio society should perhaps reconsider their decision,” he added. “Without the commitment and the funds, the Amateur Radio community would have little influence in that process, let alone could be present at the relevant meetings.”

RSGB VHF Manager John Regnault, G4SWX, in a related Moon-Net post, said the flood of “fake news” on the issue propagated via social media and online petitions does not help Amateur Radio’s position.

“All IARU member societies have been briefed on a common position and messages for Amateur Radio,” Regnault said. “This message is not helped by the many wrong messages abounding on social media. IARU

represents Amateur Radio in the various CEPT forums and ITU, and [it] will fight to maintain the best position it can for Amateur Radio. Progress will be slow, but I am hopeful that, in the end we will get a good result.”

REMINDER!!!! Illinois AND Missouri!

"Each day, law enforcement officers, firefighters, emergency response personnel, and highway workers encounter situations which place their lives in jeopardy while protecting the citizens of Illinois. This legislation helps to ensure that they can perform those duties out of harm's way."

Penalties for violating Scott's Law include:

a fine of not more than \$10,000 suspension of driving privileges for a period of up to a year but not less than 90 days for damaging another person's property suspension of driving privileges for a period of not less than 180 days but no more than two years for injuring another person a two-year suspension of driving privileges for causing the death of another person.

The ISP encourages motorists to follow these precautions when approaching an emergency vehicle with its lights activated:

Slow down and proceed with caution. Yield the right-of-way by changing into a lane not immediately adjacent to the emergency vehicle. Be prepared to pull over to the right-hand side of the roadway and stop if directed to do so. Be watchful of the movement of emergency personnel and equipment. ISP advised the legislation applies to all vehicles displaying flashing lights, including highway maintenance vehicles.

IARU President Offers Assurances Regarding French 144 – 146 MHz Allocation Proposal

07/10/2019

International Amateur Radio Union (IARU) President Tim Ellam, VE6SH/G4HUA, said his organization empathizes with the concerns of radio amateurs worldwide regarding a French proposal to allocate 144 – 146 MHz to the Aeronautical Service on a primary basis, essentially sharing it with Amateur Radio. The band is currently allocated to Amateur Radio on a primary basis around the world. Ellam this week offered assurances that the IARU is on top of the matter, which is still a regional issue, and is already working to keep the band in the hands of radio amateurs. While the issue could end up on the agenda of World Radiocommunication Conference 2023 (WRC-23), a lot would have to happen first.

“There is a lot of misinformation circulating as to what the proposal is seeking and how IARU is responding to it,” Ellam told ARRL. “While the proposal is a concern, petitions and the like, while well intended, are going to have very limited value and, in fact, may harm the steps being taken in the regulatory environment.”

The French proposal, submitted last month to a pre-WRC-19 European Conference of Telecommunications and Postal Administrations (CEPT) meeting, included 144 – 146 MHz within a range of frequencies to be studied for future airborne, non-safety applications in the Aeronautical Service. Germany opposed the move, and IARU “objected strongly,” Ellam said. “Nonetheless, the proposal was carried forward to the next meeting of the CEPT Conference Preparatory Group in late August.” IARU anticipates that other countries attending the August meeting will oppose the inclusion of 144 – 146 MHz as a frequency range to be considered for the WRC-23 agenda, Ellam said.

Since the June meeting, IARU Region 1 (Europe, Africa, and the Middle East) has asked its member-societies to contact their national administrations (i.e., governments) to explain the importance of the 144 – 146 MHz primary allocation, Ellam recounted. “IARU is also taking other actions to make its views known to those involved in the proposal,” he said.

According to Ellam, the French proposal provides no rationale for including the amateur band in the proposed spectrum study, and that IARU believes sharing with airborne systems would be extremely challenging and lead to constraints on the development of the Amateur and Amateur Satellite services. IARU has pointed out that suitable alternative spectrum exists in the VHF range.

“If accepted as a WRC-23 Agenda Item, this proposal would require 4 years of studies by administrations,” Ellam stressed. “Considering the challenges of sharing spectrum with aeronautical systems, it seems inevitable that the conclusion of such studies would be that sharing with a widely used part of the amateur spectrum presents too many problems to be viable.”

Ellam encouraged individual radio amateurs who want to help to become members of their IARU member-society — ARRL in the US. “The work they do is not as well-known as it should be and receives very little recognition,” Ellam said. “Support from all radio amateurs to the work of IARU is vital to meet threats to the amateur spectrum.”

Ellam attributed Amateur Radio’s success at previous WRCs in defending against spectrum threats and gaining new bands to “the support for IARU from its member-societies and the dedicated work of IARU representatives — all of whom are volunteers.”

“If anything,” Ellam concluded, “this recent news about a potential risk to 144 – 146 MHz should serve as a timely reminder that defense of the amateur spectrum does not just happen. Your member-societies and the IARU constantly work at defending the amateur allocations.”

AMATEUR RADIO EXAMS

**WALK-INS ARE WELCOME! PLEASE CALL AHEAD IF POSSIBLE.
DOORS OPEN AT 6PM!**

**CLIFF CAVE BRANCH, ST. LOUIS COUNTY LIBRARY
5430 TELEGRAPH RD, OAKVILLE, MO 63129**

General Club Information

The club holds a monthly meeting on the first Thursday of the month and is open to all. Visitors are always welcome at the meetings. The next meeting is August 1st, at 6:30pm at the Holy Family Community Center at 2600 Washington Ave in Granite City, IL. Members tend to arrive early to socialize, and the actual meeting starts at 6:30pm. After the meeting, there is usually a social gathering at a local restaurant. "The meeting after the meeting."

The club has a informal net every Tuesday at 8:00pm on 146.76. The PL and time-out timer are turned off for the net. You do **NOT** need to be a member to participate or use the repeater, as it is open to **ALL** licensed Amateurs. Be sure to "stop in" and say hi!

Anyone interested in joining the Egyptian Radio Club will find an application at the end of this newsletter.
